Alexander Road Resurfacing Project To Begin On or About  
Monday, May 18th

West Windsor announces that construction activities for the Alexander Road Resurfacing Project, between Vaughn Drive and Roszel Road, will commence on or about Monday, May 18th, weather permitting. Earle Asphalt Company has been retained by the Township for this project which will provide for:

- Resurfacing of asphalt surface course; removing and reconstructing concrete curb, sidewalk, and handicap ramps, as required; rehabilitation of inlets and installation of compliant inlet headers and grates, as required; striping and pavement markings, other incidental work and traffic control as necessary to complete the work.

This project is limited to the two "west" bound lanes, from Vaughn Drive towards US Route 1, and the center turn lane. Work will begin with necessary curb and sidewalk replacements and regrading of portions of the outer lane near Alexander Park to correct drainage problems. Work will then progress into other subgrade repairs, and then pavement milling and resurfacing of all three lanes. During the work there will be lane closures between the hours of 9:00 AM and 4:00 PM. Please honor all posted temporary traffic control measures for your own safety and the safety of others.

The construction duration for this project is a maximum of 45 calendar days, weather permitting.

If you have questions concerning this project, please contact the West Windsor Township Engineering Division at (609) 799-9396.
